PROJECT DOCUMENTATION

Responsive Personal Portfolio Website

Prepared by: Areeha Arif

Internship Organization: Devixo Solutions

Internship Domain: Front-End Web Development

Task Number: Task 01

Technologies: HTML5 and CSS3

1. Objective

The objective of this project was to develop a responsive personal portfolio website using HTML5 and CSS3. The website presents personal information, academic background, technical skills, projects, and contact details in a clear and accessible format. The project focuses on responsive design, structured HTML, reusable styling, and an intuitive user interface.

2. Technologies Used

- **HTML5:** Used to structure the website and create its sections, navigation, cards, and form elements.
- **CSS3:** Used to style the website, manage layouts, create hover effects, and implement responsive designs using media queries.

3. Website Structure

- **Home:** introduces the developer and provides a navigation button to the projects section.
- **About:** provides a brief personal introduction and background.
- **Skills:** displays technical skills using cards, descriptions, and progress indicators.
- **Education:** presents academic qualifications.
- **Projects:** showcases selected projects with descriptions and relevant links.
- **Contact:** displays contact information and a contact form interface.
- **Footer:** provides quick navigation links and contact details.

4. Design Approach

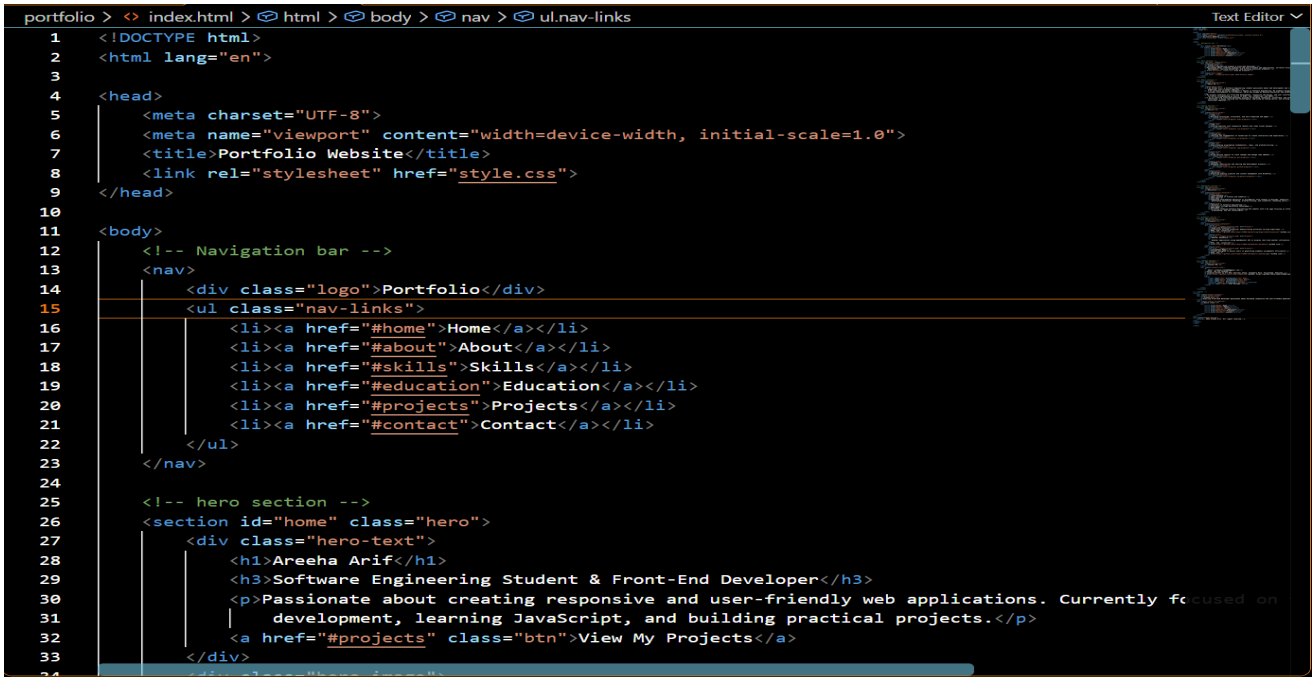

The website uses a consistent brown and light-brown color palette with a clean layout and clearly separated sections. Cards are used to present skills, education and projects in an organized format. Hover effects provide visual feedback, while CSS media queries adapt the layout to different screen sizes.

5. Website Features

- Navigation links to different website sections.
- Personal introduction and academic information.
- Technical skills cards with descriptions and progress bars.
- Education and project cards.
- Contact information and form interface.
- Footer with quick navigation links.
- Hover effects.
- Responsive layouts for desktop, tablets, and mobile screens.

About Me

I am Areeha Arif, a Software Engineering student passionate about web development and creating visually appealing, user-friendly websites.

I am currently pursuing a Bachelor's degree in Software Engineering. My academic background also includes Intermediate in Pre-Medical, which has helped me develop analytical and problem-solving skills.

My primary interests are front-end development, responsive web design, and user interface design. I am currently strengthening my skills in HTML, CSS, JavaScript, and React.

I am an aspiring front-end developer focused on building responsive, accessible, and user-friendly web interfaces. I enjoy learning new technologies, improving my coding skills, and turning design ideas into functional websites.

Skills

HTML
Building structured, accessible, and well-organized web pages.

CSS
Styling websites with responsive layouts and clean visual designs.

JavaScript
Learning the fundamentals of JavaScript to create interactive web experiences.

C++
Understanding programming fundamentals, logic, and problem-solving.

Git
Using version control to track changes and manage code updates.

GitHub
Managing repositories and sharing web development projects.

WordPress
Exploring website creation and content management with WordPress.

Education

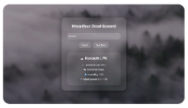

Intermediate
Johar College of Science and Commerce
2022-2024
Completed Intermediate education in Pre-Medical with studies in Biology, Chemistry, and Physics, developing analytical thinking, problem-solving, and scientific reasoning skills.

Bachelor of Software Engineering
Government College University Faisalabad
2024-2028
Currently studying Software Engineering 5th semeter with 3.62 cgpa focusing on software development, programming, and web technologies.

Projects

Algorithm Visualizer
Interactive sorting visualizer demonstrating different sorting algorithms.
HTML, CSS, JavaScript
GitHub Link

Weather Dashboard
Weather application using OpenWeather API to display real-time weather information.
HTML, CSS, JavaScript
GitHub Link

Assignment Maker
Project designed to assist users in generating academic assignments efficiently
HTML, CSS
GitHub Link

The repository contains the source code, assets, screenshots, README, and final report.

11. Conclusion

This project provided practical experience in developing a personal portfolio website using HTML5 and CSS3. It helped strengthen my understanding of website structure, styling, responsive layouts, and user interface presentation. The completed portfolio provides an organized way to present my academic background, technical skills, and projects.
